Hello Katie –

Thanks for the kind thoughts. Yes, the sub applications are keeping us quite busy! I've answered your questions within your note …

Enjoy your day!

Subject: Three Licensing Questions

Hi, Tanya –

I have been thinking of you and your team during what I'm sure is a crazy time for sub applications because of the Denver strike. I hope you all are hanging in there!

I was hoping you could help me with three questions:

1. Do elementary PE teachers need the PE endorsement, or can they teach PE with an

elementary endorsement? The elementary endorsement covers only English, math, science and social studies for grades k-6, so a PE k-12 endorsement would be the appropriate one.

2. Are you aware of anything that would prevent a teacher with an English Language Arts endorsement from being an English Language Development teacher, if that educator meets district requirements for ELL instruction? In general, no, though I wouldn't consider that an "across the board" response. I think it really depends on the specific situation.
3. We have two alums (our first cohort has graduated!) who have repeatedly been ~1 point away from passing the secondary math praxis. One of them has enough credits for the MS Math endorsement and the other passed the MS Math Praxis. Both plan on applying for the MS Math endorsement. Their names are Malcolm Ramey and Danielle Mapes. My understanding is that they should be eligible for this endorsement, but can you confirm? This is the same situation as Molly Smith who just went through this process. That should be fine. If they went through the program for secondary math, though, that should be indicated on their verification form. In their applications, they would select MS math and include either their test score report or, in the case of the individual with coursework, a completed MS math worksheet.

Thanks for any/all insight you have on these questions. Our graduate students and I appreciate your help!

Warm regards,
Katie
